MESSAGE FROM **CHAIRMAN**

No doubt that a journey of a thousand miles begins with a single step. To develop our present we must have a clear vision for the future, and that what Ayedh Bin Dejem Group has achieved by "the grace of almighty God" being a leading group in the domain of sea and road transportation in addition to storage of (H.F.O) from Saudi Aramco to our customers, the biggest cement companies in the Kingdom.

Based on this, nothing is impossible is nothing for us as a group; with determination, persistence, and extensive scientific studies we overcome challenges and difficulties to find innovative solutions to reach our objectives and plans, to meet the growing needs of our customers, along the comprehensive renaissance in the Kingdom of Saudi Arabia under the Government of the Custodian of the Two Holy Mosques. Our services are not limited to sea transportation, storage, and road transportation only, but we are also partners in prosperity and a source of growth in the Kingdom of Saudi Arabia.

Ayedh Bin Dejem

CLOUD BASED ERP SOLUTIONS FROM CDE

An Enterprise Resource Planning (ERP) system is a fully integrated business management system that covers functional areas of an enterprise like, Production, Logistics, Accounting, Human Resources, and Finance. It categorizes and incorporates operation procedure and information flows to make maximum utilization of resources like as manpower, material, finance, and machine.

SAP ERP Central Component (ECC) is defined as the previous generation of SAP's Enterprise Resource Planning (ERP) software. Our experienced consultants have a thorough knowledge of SAP applications and ERP's including the recent release of SAP Enterprise Control Component (ECC). CDE's expertise in SAP implementations help businesses in quicker implementations and at a low cost when compared to competitors

It is the next generation business suite which is designed to help you run in a digitized world. It is built on the in-memory SAP HANA platform. The main objective of this business suite is to drive instant value all across the lines of industries and business with simplicity.

You can gain more control over your business with this business management software designed for medium-sized or small enterprises. Also known as SAP B1, this software has functional modules for customer relationship management, finance, production management and warehousing, reporting and analytics, purchasing and procurement.

TAKE THE RIGHT ACTION AT THE RIGHT TIME USING DATA WITH MODERN BUSINESS INTELLIGENCE PLATFORM

Our Business Intelligence Solutions provide systems and tools that play a vital role in the strategic planning process of a company. The Business Intelligence allows a company to store, access and integrate data to utilize it for the right action at the right point of time. BI solutions by us focuses on helping clients collect and then analyze internal and external data for generating value for their company.

SAP Business Intelligence (BI) is a suite of front-end applications that permit business users to view, sort out and study business intelligence data. Our SAP BI approach offers a holistic outlook of business behind the data and a comprehensive approach to attain success. With us, you can be confident as you will be backed by professional consultants and a standardized procedure.

This software is one of the most engaging and fastest ways to attain answers from your data, no matter small or big. By allowing you to pull your data directly from enterprise and ad sources bringing all together in a repeatable manner without any need to ask for help from an IT organization, SAP Lumira redefines the idea of self-service info.
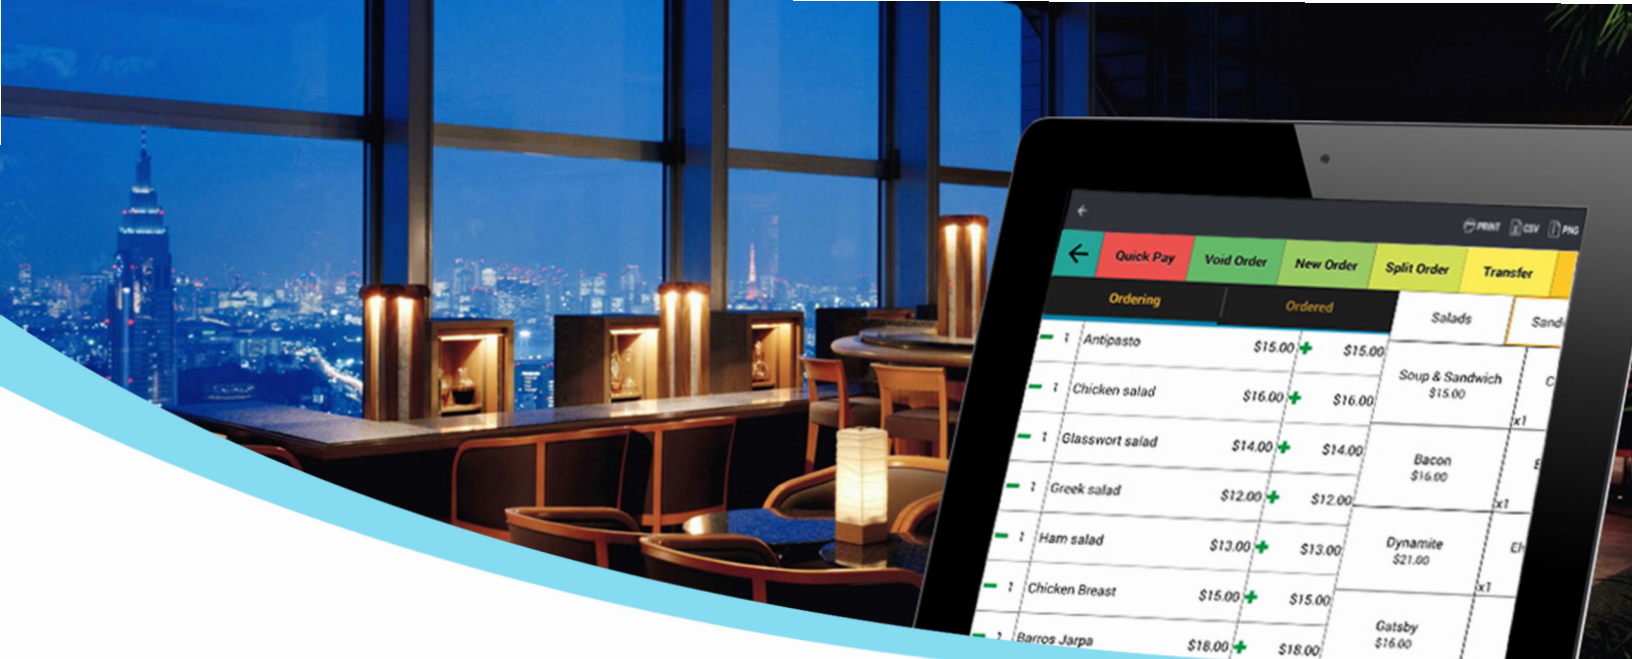

Power BI is a suite of business analytic tools for sharing insights and analyzing data. With Power BI, business users get a 360-degree view with their vital metrics all in one place, updated in real-time, and available on all the devices.

Onion Py simplifies business intelligence and allows to manage data in an easy way. It is the best option for managing all the data that is stored and spread in different applications. Whether you want to understand ROI, or optimize the production capacity, Onion PY will be helpful.

POINT OF SALE

Speed up your check-out procedures and enhance your customer service with a feature-rich Point of Sale that is known for its ease of use. You can also customize the POS layout to fit your needs.

GENERAL SALES OPERATION

Search and choose an item by name, image or barcode. Then finish the transaction or suspend it and recall it for the processing later.

BARCODE SCANNING

Configure barcodes for scanning and identifying customer and items details or to generate a gift card or a credit memo.

SUPPORT FOR SEVERAL ACCOUNTS

Create multiple accounts, like income accounts and expenses, in back office and maintain a record of all the transactions.

TCPOS is a leading IT solution provider for retail and hospitality. The complete solutions designed by TCPOS support the effective development of organization. With the reliable and innovative features TCPOS contributes to enhanced profitability and make your business a success.

It is a fully integrated point of sale system designed for busy retailers. The system assimilates with all SAP ERP solutions and offers a single overview of all the sales data across the entire company.

INDUSTRIES WE SERVE
